Key Investor Information
This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

Strategic Europe Quality Fund (the "Fund")
A sub-fund of E.I. Sturdza Funds plc ("the UCITS") managed by Eric Sturdza Management Company S.A. (the Management Company).
SI EUR Share Class ISIN: IE00BD03RJ76 (the "Representative Class").

INVESTMENT OBJECTIVE & POLICY
The investment objective of the Fund is to achieve long term capital growth, by investing primarily in equities or other asset classes representing the return of equity securities listed on exchanges within Europe, although a maximum of 25% of assets can be invested outside of Europe.

The Fund expects to invest in a concentrated portfolio of between 25-35 individual securities, which will primarily be listed on a Recognised Stock Exchange targeting underlying investments that can easily be bought or sold in the market with few liquidity constraints.

The Fund may use financial derivatives such as futures and options both to hedge the value of the assets within the investment portfolio or to gain additional investment. It is therefore possible that a large proportion of the Fund's assets may be invested in financial derivative instruments at any one time which may enhance or detract from the performance of the Fund.

The Fund is actively managed, with reference to the MSCI Europe Total Return Index (the “Index”) for performance monitoring. The Investment Adviser is not subject to constraints in terms of deviation from the benchmark composition and may use its discretion to invest in securities/sectors which are not included in the Index. The degree of freedom from the Index may potentially be significant.

You can buy and sell your shares in the Fund on a daily basis. The Shares that you will hold in the Fund are accumulating, meaning that the income from the Fund's investments will be included in the value of your shares rather than being paid as a dividend.

This Fund is deemed appropriate for investors who plan to invest with a medium to long view.

Pursuant to the EU's Sustainable Finance Disclosure Regulation (EU) 2019/2088 ('SFDR'), this Fund is classified as a fund that promotes environmental or social characteristics. The Fund will have an averaged ESG score higher than the averaged ESG score of its initial investment universe. For more information on this Fund's investment approach with respect to sustainability and non-financial criteria, please refer to Annex I of the Fund's prospectus supplement or www.ericsturdza.com.

The risk indicator is based on historical data and may not be a reliable indicator of the future risk profile of the Fund, is not guaranteed and may change over time. The lowest category does not mean risk free.

The risk indicator for the Fund is set as 5, which reflects the historic price behaviour of the Fund. Factors that affect the indicator include:

Investments in equity securities are subject to fluctuations in value dependent on market conditions which will directly affect the value of investments held by the Fund.

The Fund invests with a focus on one region which may increase the risk of investing when compared to a fund that invests in a globally diversified range of countries.

The Fund invests in a concentrated portfolio of investments that may potentially focus on one or more sectors or industries. The range of investments may increase the risk profile of the Fund compared to a more diversified portfolio across sectors and industries.

Additional risks of investing in this Fund include:

Currency Risk: the risk that changes in the exchange rates of the currencies of the investments in which the Fund invests may adversely impact the value of the investments held by the Fund.

Custody and Settlement Risk: the risk that the transactions entered into by the Fund are not settled or registered as appropriate.

Financial Derivatives Risk: the risk that financial derivatives may increase or reduce exposure to underlying assets and may create gearing; therefore their use may result in greater fluctuations of the Net Asset Value of the Fund.

Liquidity Risk: the risk that the assets of the Fund may have low levels of liquidity in some circumstances.

Operational Risk: the risks associated with correctly reflecting the value and safekeeping of the assets of the Fund.

Taxation Risk: the risk of changes in taxation regimes, including legal and regulatory changes.

The Prospectus and Supplement provide further details about other risks the Fund may be exposed to – please refer to the “Practical Information" section for details of how to obtain a copy.
